Multi-indication immunotherapy laser system

ML7710 is a laser built for the doctor and patient. It includes all the safety features and easy to use graphical touch screen interface.

The product can house up to 6 lasers with aiming beam to support multiple indications. Many prestigious institutes in the field of oncology and surgery have bought ML7710 - some are also repeat customers. The product has an internal calibration unit for ultimate clinical quality assurance.

ML7710 is CE (Basal cell carcinoma, Non-small cell lung cancer, Head and neck cancer, High grade dysplasia in Barrett's esophagus) and ETL (US & CAN) approved.

application	wavelengths (nm)	power (W)
Photodynamic therapy (PDT)	630 635 652 660-690 753	1-15
Surgical	810 940 980 1320 1470 1940	10-50
Dentistry	405 450 665 810 980 1470	1-30
Photo disinfection	635 665 810	1-5
Aesthetic	810 940 980 1470	1-30
Vein treatment	980 1470	10-15
Hyperthermia of tumors	940 980 1064	15-50

Some standard optical configurations for medical applications.

Your benefits

- CE and ETL mark
- Comes with regulatory documentation
- CB tested to US/CA, EU, CH, Japan, SG, China
- Fast product launches
- Service and life-cycle support
- Lowest TCO
